

AFTERMARKET SALES & SERVICE

Mestek is proud to announce our new Aftermarket Sales & Service Division in Cedar Rapids Iowa. Dave Krivanek Sales/Service Mgr. & Ev Bowen Sales/Service are there to assist you with all of your equipment & service needs.

Our staff has the expertise to keep your company updated with the newest technology offered today in our industry along with upgrading & repairing your existing equipment.

- **1. Controls:**

Iowa Precision Industries has developed new controls for your Welty Way, Iowa Precision, Engel & Lockformer equipment to replace your obsolete controllers & DOS systems. These new units are able to give you faster & more accurate production, in most cases, depending on the current condition of your equipment. The units have been designed & built within our company for faster delivery, better trouble shooting & repair of these systems instead of relying on vendors where you run the risk of items being discontinued or poor support.

Control contracts are available for troubleshooting your control issues. When purchasing new controls, a one (1) year contract will be included. At the end of one (1) year; you will have the option to renew this contract with two (2) options to choose from.

- **2. Rebuilds:**

Mestek prides itself on the turn around time we are able to give you, the customer, when rebuilding is necessary. Down time is the big picture with ALL customers. Being down means lost production & revenue for your company. This is why Mestek, with its trained Service Engineers backed by Mechanical, Electrical & Programming Engineers are able to get you up & running within a reasonably short period of time.

Mestek Machinery

LOCKFORMER • IOWA PRECISION • ENGEL

5480 Sixth Street S.W. F Cedar Rapids, Iowa 52404 F Tel: 319.364.9181 F Fax: 319.364.3436

- **3. Equipment:**

Updating & adding equipment to existing units, not only in the USA but Overseas, has become a big topic with a lot of companies. Add-ons such as Shear Brakes, Recoilers, Glue Systems, Tables, Uncoilers, Pinning etc. have been in big demand with our customers. Mestek is able to supply you with several add-ons to expand production in your facility & gain the profits you demand at a reasonable price.

Used equipment is also in demand. With the resources at hand, we are able to find most of the equipment our customers desire to purchase. Once we locate the equipment & evaluate the product, we let the two parties work out the details for the sale of these units. There is no charge for this service to our customers wishing to purchase these items. We do all the work, you reap all the benefits. One of many ways Mestek says thank you for being a loyal customer.

Moving equipment is another service we offer. We can assist you with your move or do it as a Turn Key Operation for you. Contact us for further details.

For more information in regards to these services & others, please contact us through the following.
